## Senior Full-Stack Engineer — TypeScript / Node.js / Vue & React

Ho Chi Minh City, Vietnam | Remote | +84 82 726 0676 | hvanlong@pm.me

linkedin.com/in/8bu | github.com/8bu | 8bu.dev | Available immediately | English: B2+

### PROFESSIONAL SUMMARY

---

Senior Full-Stack Engineer with 10+ years building and shipping production web platforms end to end. Works across the stack in TypeScript: Vue/Nuxt and React on the front, Node.js (Express, NestJS, Hono) with PostgreSQL and GraphQL on the back, deployed on AWS Serverless, Docker, and Cloudflare Workers. Has architected modular monolith systems, led two framework migrations on large legacy codebases, designed database schemas and APIs from scratch, and owned features from requirements through testing, release, and production support. Four years in a fully remote B2B SaaS team setting architecture standards, running code reviews, and mentoring developers. Domains span SaaS, fintech, marketplaces, and developer tooling.

### TECHNICAL SKILLS

---

**Core** — daily, in production, interview-ready: TypeScript and JavaScript ES6+ (7 yrs) · Node.js and Express (5 yrs) · PostgreSQL and SQL (5 yrs) · Vue 3 and Vue 2 (6 yrs) · Nuxt 4 / 3 / 2 (6 yrs) · REST API design · SCSS / Sass (7 yrs) · Tailwind CSS (5 yrs) · Git · Vite

**Proficient** — shipped to production: React · NestJS, Hono · GraphQL · authentication, OAuth and session handling · schema design, query optimisation, indexing, full-text search, pgvector · Docker and docker-compose · AWS Serverless · CI/CD · monorepos (pnpm, Turborepo) · Pinia and Vuex, Composition API and Options API · SSR, SSG, middleware and plugins · Axios, feature flags, complex multi-step forms · Web Components · design systems and component libraries · HTML5, CSS3, BEM, CSS Variables · Webpack · ESLint, oxlint/oxfmt · Jest, Vitest, Vue Test Utils, Cypress, Playwright · Core Web Vitals, caching, lazy loading, code splitting · technical SEO, dynamic metadata, JSON-LD · Stripe payments · i18n pipelines · Cloudflare Workers · Ethers / Web3

**Working knowledge** — used, not specialised: Nginx (reverse proxy, routing) · Next.js · Redux, Zustand · Storybook · LESS, Stylus, UnoCSS · The Graph subgraphs · Google Tag Manager and tracking pixels · Webflow · WordPress

### PROFESSIONAL EXPERIENCE

---

#### Senior Web Developer — WegoPro (formerly Travelstop)

Mar 2022 – Apr 2026 | Full-time, Remote | B2B SaaS: corporate travel and expense management

- Designed the modular monolith architecture adopted team-wide, defining module boundaries, shared libraries, and integration contracts across several applications and APIs.
- Solo-owned the back-office platform end to end: requirements, data model, API integration, UI, tests, release, and self-managed AWS serverless infrastructure.
- Migrated a large legacy Nuxt 2 / Vue 2 codebase to Vue 3 + Vite with a Strangler Fig strategy, shipping a parallel application as Web Components into the legacy host shell with no downtime and no feature freeze.
- Integrated Stripe billing, authentication flows, complex multi-step forms, and third-party services; built the transactional email and i18n pipeline (EJS/ETA, nuxt-i18n, Phrase) for multiple locales.
- Optimised SSR and hydration, caching, lazy loading, and bundle size; made Core Web Vitals and cross-browser compatibility release gates.
- Set engineering standards, led code reviews, troubleshooted production incidents, and mentored developers while working daily with Product, UI/UX, Backend, DevOps, and QA.

## Lead Web Developer — BlockDevs

Jun 2019 – Jan 2022 | Full-time, Ho Chi Minh City, Vietnam | Fintech platforms

- Led the team and owned full delivery of two production fintech platforms (Multiplier.finance, SuperLauncher): backend, frontend, data layer, and integration.
- Architected and built Node.js/Express services from scratch: REST and RPC APIs, authentication and session handling, and PostgreSQL schema, queries, and indexes.
- Built GraphQL indexing services (The Graph subgraphs) and the query layer consumed by both frontends.
- Shipped a reusable integration module used across both products, plus shared infrastructure and Docker-based local environments; led the Vue 2 to Vue 3 migration and introduced TypeScript and Vite.
- Ran technical interviews and code reviews, and set the engineering quality bar for the team.

## Web Developer — Motorist.sg

Dec 2017 – Jun 2019 | Full-time, Ho Chi Minh City, Vietnam | Automotive services marketplace

- Led the migration of the customer platform to a server-side-rendered Nuxt 2 architecture, improving page load and search engine indexing for a public, SEO-driven marketplace.
- Built the marketing site and the internal back-office platform, including dynamic metadata, structured data, and sitemap generation.

## Web Developer — Letterink

Mar 2016 – Dec 2017 | Full-time, Ho Chi Minh City, Vietnam | Digital agency

- Built and maintained client websites and the company website in HTML5, CSS3, JavaScript, and WordPress, covering cross-browser support, on-page SEO, and analytics tagging.

## PERSONAL PROJECTS

---

### Cosimi — deterministic retrieval engine and SDK ([github.com/8bu/cosimi](https://github.com/8bu/cosimi))

Creator, solo developer | 2026

- Designed and built a source-traceable retrieval engine: a four-tier matching cascade over PostgreSQL full-text search, trigram similarity, and pgvector semantic search, with no model call at query time.
- Built the offline ingest pipeline and packaged the runtime as a reusable TypeScript SDK with injected SQL and embedder dependencies.
- Deployed on Cloudflare Workers with Hyperdrive and Neon; serves streaming responses over SSE in production.

**Stack:** TypeScript, Node 22, Hono, PostgreSQL 16 + pgvector, Cloudflare Workers, Hyperdrive, Neon, Tailwind CSS, Vitest, pnpm/Turborepo.

### NTWRX — brand and creator rewards platform ([ntwrx.com](https://ntwrx.com))

Web Developer and UI/UX Designer | 2025

- Designed and built the Nuxt 3 frontend: landing page, campaign creation, discovery, and rewards analytics UI, including technical SEO and analytics tagging.

**Stack:** Nuxt 3, Vue 3, TypeScript, Tailwind CSS, Pinia, REST APIs, Ethers.

## EDUCATION

---

**Ton Duc Thang University** — Computational and Applied Mathematics, 2014–2016 | Ho Chi Minh City, Vietnam
